

## NOTICE TO OUR PATIENTS

Insurance companies have contractual changes with laboratories that are Participating Providers throughout the year. In an effort to protect our patients from having a laboratory bill with higher out of pocket expenses, we advise you to contact your insurance carrier by calling the Customer Service phone number or go to their website found on your insurance card before your visit to our office.

Verify the name of the laboratory that is contracted in the Clark County, Washington area. When you arrive for your visit, if you will provide that information to our medical staff, they will ensure that your specimens are sent to the contracted lab.

Please see below for the most often used sources: Please designate below the laboratory you would like used for your services. Charges for lab work done by a non-preferred provider and patient portion not paid by the insurance become your responsibility.
